🌐 my-github   🌐 my-linkdIn   🌐 my-portfolio

## SUMMARY

Adaptable and skilled fresher in front-end development, specializing in React.js and Next.js. Committed to continuous learning and passionate about creating exceptional user experiences. Well-prepared to contribute expertise to dynamic projects and stay current with industry trends.

## SKILLS

- Html
- CSS
- JavaScript
- React-JS
- Next-JS
- Redux-Toolkit
- Github
- Tailwind css

## EDUCATION

### Bachelor of Technology • 2019–2023
Sagar Institute of Reasurch & Technology
Electronics and communication

## PROJECTS

### Educational Website
Teckstack : html , CSS , JavaScript
- *A static educational platform website developed using HTML, CSS, and JavaScript.*
- *Features multiple pages, including a Home page for introductions, Courses page for course listings, and a Contacts page for user inquiries.*
- *Ensures the website is visually appealing and functional on various devices, from desktops to mobile phones.*

### Notes Keeping Web-app
Teckstack : Next-js , Tailwind css
- *Developed using Next.js, showcasing proficiency in modern web development.*
- *Implemented robust task management features, including task creation, editing, deletion, and completion.*
- *Potentially added features like task prioritization, due dates, and color-coding for enhanced task organization.*
- *Designed with a responsive layout for optimal user experience across various devices.*

### Unsplash Clone (Images finder)
Techstack : Next-js , Tailwind css , Api data fetching , Client side rendering
- *Utilized the Unsplash API to provide real-time access to a vast collection of high-quality images.*
- *Implemented a robust search feature enabling users to discover images based on keywords or categories.*
- *Included features to view image details, such as author information, download options, and image statistics.*
- *Ensured a responsive and visually appealing layout for seamless user experience across devices.*

### Cinema Webapp (movies listing )
Techstack : Next-js , Tailwind css , Api fetching ( used tmdb api )
- *Created an intuitive and visually appealing user interface for efficient movie searching and browsing.*
- *Implemented robust search and filtering features, enabling users to explore movies by thire name , peoples and explore trendings,*
- *upcommings as well as tv shows also*
- *Utilized Redux Toolkit for efficient state management, providing a seamless user experience with minimal API calls.*
